Scenario

You are an iPhone user who cares about your privacy. You want to know about the privacy-related behaviors of your recently used apps. So you need to go to *Settings > Privacy* (or *Privacy & Security*) *> App Privacy Report,* where you can get a more complete picture of how the apps you used treat your data.

Task 1: Check the data access of your apps.

Task 2: Check the domain connections of your apps.

Screen 1 — Settings › Privacy & Security

‹ Settings   **Privacy & Security**

Journaling Suggestions ›

Safety Check ›

Protect your personal safety by staying aware of which people, apps, and devices have access to your information.

Sensitive Content Warning   Off ›

Detect nude photos and videos before they are viewed on your iPhone, and receive guidance to help make a safe choice. Apple does not have access to the photos or videos. Learn more…
